Each One! Bless One!

* * * * *

When speaking to your child, use regular conversational tones, instead of baby talk. This will allow your child to understand your words quicker.

"Then Manoah intreated the LORD, and said, O my Lord, let the man of God which thou didst send come again unto us, and teach us what we shall do unto the child that shall be born."

JUDGES 13:8 (KJ)

Baby talk. Father God bless and keep you in His Will and the Power of His Son Jesus Christ of Nazareth. Amen.

I want to share with you a technique I learned many years ago. This technique I learned from Helen Keller through the impartation of the Holy Spirit, and I have applied it to both of my daughters as they grew up. This technique helps children learn to talk quicker than normal. Use it on children from newborn to toddlers; any child before they begin to speak.

To get your child to speak sooner than normal, take one of their hands and place it on your throat. Place their right hand on your trachea or your Adam's apple. Place that hand where there will be the most vibration from your throat, from your speaking. Now began to speak in your normal speaking voice, not baby talk. Since you will be holding the infant often, just remember when you speak to your child, to place your child's hand on your throat and allow your child to feel the vibrations of your words. Look into his eyes as you speak.

After you have done this for you few days, now you want to take the child's other hand, when you're speaking and place the child's hand in your mouth. You want to place the child's left hand in your mouth just under the tongue; if not under the tongue on top of the tongue. The point

here is for the child to feel the movement of your tongue as you speak. Now remember, the child's other hand, is on your throat, feeling the vibrations of your words. Look into your child's eyes as you speak.

As you are speaking, your child is feeling the movement of your tongue on his left hand, more correctly, on his fingers. As this is happening, your child is feeling the vibrations of your words on his right hand, on his fingers. After you do this for a few days, you will notice that your child's eyes will brighten as the child understands and makes the correlation between: 1) the movement of your tongue, 2) the vibrations of your throat, and 3) the sounds coming out of your mouth.

I have shared this technique with many parents. There is always a positive result from this sharing. Children learn to speak sooner than normal and learn to recognize words, faster. Let me recap. **First**, you want to speak in normal conversational tones, not baby talk. **Second**, you want to place your child's right hand on your throat, preferably on or near your Adam's Apple. Do this for two or three days. **Third**, you want to place your child's left hand in your mouth, on your tongue, or just under your tongue, so your child can feel the movement of your tongue as you speak in normal tones. **Fourth**, you want to look for the spark of understanding in your child's eyes, as your child makes the correlation between the movement of your tongue, the vibration of your throat, and the words coming out of your mouth.

You will be completely amazed to watch your child respond to this simple technique that I learned from Helen Keller as imparted to me from the Holy Spirit. It is wonderful to hear from the Holy Spirit and to follow His direction. Have a wonderfully blessed day in the Lord.

USE NORMAL TALK WITH YOUR CHILD, NOT BABY TALK
