

GOD'S CHILDREN INTERNATIONAL

Joseph Klougan
GCI Founder

Have you ever been compelled to do great things but didn't know where to start? Have you ever been inspired to help others but lacked direction of how to do it? Well thanks to two dreams that I had some ten years ago, I am now committed to do great things by helping others. It is all because of prayer, my belief in God, and the revelation through two dreams that has given me focus and a definite purpose in life. A dream, a simple dream has forever changed my life. Help make a difference.

GOD'S CHILDREN INTERNATIONAL

Elementary School

Proposed for Zafi Village, Yoto Province, Togo

It is our desire to improve upon current educational facilities here in the village of Zafi. If you have been there, you would know our concern. There is a need for more change in this area of educational development in the Yoto Province in Togo.

In this western African province, many childhood educational experiences have been that of the children of this village today—as was the experience of Joseph K. Klougan in 1966. This should not be so—there should be more change now—more change in the educational facilities.

Together We Can Make a Change

We want to build not only a school, but a better educational experience. Our dream is an elementary educational school complex which will have enough classrooms to accommodate the children who desire education and whose parent's dream of their educational success: graduation. Children who cannot get further education have nothing to do; they need training, therefore another of our planned projects is vocational training.

Remember this picture of the current schoolhouse that is being used to teach the children of the Yoto Province in Togo; Zafi village. Please help us provide a better educational environment by your generous giving of money, time, and resources. Will you help?

Vocational Training

Planned Integration: Zafi Village, Yoto Province, Togo
This is a fledgling operation and needs your assistance to develop into a sustainable institution which will be a positive community presence which endures for a long period of time as a monument to the human spirit.

It is by the efforts like the lady in this photo and other adults who assist children who have little to no access to opportunities to have a glimmer of hope for a positive and productive future.

We respectfully request your assistance in making their dreams come into their present realities. We call for your help in providing not only sewing equipment and the necessary peripherals, but instructional materials for this educational and vocational training program which you now have the opportunity to become a cornerstone.
